JAT Payroll Interface for ADP

ENHANCEMENT TO MICROSOFT DYNAMICS™ GP HRM

For clients outsourcing payroll to ADP, the **JAT Payroll Interface (JPI)** delivers a full-featured and reliable link between Microsoft Dynamics GP HR Management and ADP payroll solutions. **JPI**'s unique bi-directional design bridges the gap of operational inefficiency by streamlining processing between HR and Payroll. **JPI** enables a best of both worlds scenario commonly referred to as *rightsourcing* - a tactical business strategy that blends in-house applications with transactional outsourcing. This practical approach applied to human capital management provides for better control, greater flexibility and easier access to critical information while avoiding the administrative and compliance burdens of in-house payroll.

ALIGNING HR WITH PAYROLL

With the power and flexibility to support a best-of-breed application strategy, **JPI** strikes the ideal balance of cost-effectiveness and functionality - avoiding the expense and risk of a custom integration or incomplete solution. Our table-driven design enables you to easily transform extensive employee data and updates from Dynamics GP HRM to ADP without modifying programs. With this procedure, users are relieved of manually entering the same information in both systems. Conversely, after checks are issued, detailed pay data is returned from ADP to Microsoft Dynamics GP and is accessible via the HRM Self Service Suite for Microsoft Business Portal.

Key benefits of JPI:

- Cuts processing costs by minimizing redundant data entry
- Improves data integrity by reducing keying errors
- Enhances reporting with consolidation of HR and pay data
- Allows employees to view their own paychecks via Business Portal
- Updates General Ledger in detail with information from ADP

BETTER BY DESIGN

JPI is a two-way data exchange that is highly customizable and simple to maintain. The export from Dynamics GP to ADP provides for the extraction, validation and translation of updates made to an employee record in HR; including new hires, employee status changes, time/earnings transactions, accrual balances (vacation and sick) and one-time benefits deductions. At user-defined intervals, or on demand, **JPI** creates an export file in the required ADP format to update corresponding fields. The process includes a complete transfer activity and exceptions report, providing a payroll supervisor with proper controls to validate and confirm the data transfer.

Upon completion of the ADP pay cycle, **JPI** extracts pay detail from the returned checks file and updates Dynamics GP Payroll Management. This return feed, unique to **JPI**, expands inquiry and reporting capabilities, while broadening the personal information available to employees. An added benefit is **JPI**'s ability to post ADP payroll information to Dynamics GP General Ledger in detail.

EMPHASIS ON SUCCESS

Microsoft certified, **JPI** provides a vendor supported solution that maximizes the value of critical business systems. Of course, JAT will be there to ensure the success of your project by providing comprehensive professional services. **JPI** consultants are specialists in the specific task of connecting Dynamics GP to ADP. Our implementation methodology has proven extremely successful in delivering a timely result at a reasonable cost.

TRUSTED HRM SPECIALISTS

With over twenty years of experience helping organizations achieve superior performance in Human Resources and Payroll processing, JAT Computer Consulting, Inc., is the premier HRM-focused Microsoft Dynamics GP consulting partner and integration developing ISV. JAT is a trusted member of the Microsoft HRM Partner Advisory Board and has received numerous Microsoft awards including HR Excellence, Partner Excellence Payroll and Microsoft President's Club.

In addition to our Microsoft Partner Silver Enterprise Resource Planning competency, JAT is also a formal business partner of ADP and preferred provider of integration for Dynamics GP. JAT has offices in Bridgewater, NJ, and Martinez, CA.

SOLUTION INVESTMENT

JPI software prices* are good through April 30, 2013. The **JPI** Software Enhancement Plan is required for first year customers. The annual fee is based on 20% of the current software price and includes software upgrades and updates, plus two (2) support incidents.

ACTIVE EMPLOYEES	JPI FOR DYNAMICS GP (Modular Based & Business Ready Licensing)

1,001-2,000	$15,000
Unlimited	$18,000

*Implementation services are additional and at a fixed rate based on employee count and number of locations. Please call for details.

CLIENT QUOTES

"JPI is much better than the system we had previously. It allows me to have more control if I need to change a deduction code, etc. And since only the changes are transferred to ADP as opposed to all of the data, there is less information to audit. I really like the functionality of the product."

Richard Teeter, Payroll Manager
AirTran Airways

"The JAT Payroll Interface has allowed our company to better integrate our ADP Payroll software with Microsoft Dynamics GP. Our employees are now able to view their pay stubs online through a portal maintained by our team, allowing us to save valuable time and money."

Justin Webb, Senior Staff Accountant
Perceptive Software, Inc.

"We purchased Microsoft Dynamics GP HRM, but abandoned it due to the lack of an ADP interface. After discovering JPI, we were able to use the GP HRM software again. I love JPI. It is extremely user friendly and if I have a question, the answer is a phone call away."

Laney Kahn, Senior Manager Human Resources
The Petroleum Place, Inc.
