

# EDI for Trucking

Integrated transportation software solutions that help drive your business...

## EDI for Trucking allows for X10 format seamless integrated processing of 204, 210, 214, 990 and 997 forms.

For companies that need an integrated EDI solution, this add-on for Trucking Applications provides specific functionality to process X10 format EDI files. Both Inbound and Outbound EDI files are processed using this unique software using an easy-to-enter and maintain format. This results in an increase in efficiency and productivity of employees thereby maximizing the potential of your business.

The integrated EDI processing both to-and-from trucking transactions provides nearly real-time up-to-date information for more effective delivery processing.

## Make your company people ready

*Integrated transportation software solutions that help drive your business...*

A People-Ready business is one where people can apply their unique skills, insights and experience to create new products and services, work responsively with customers and partners, and drive operational excellence in every aspect of the business. People-Ready businesses support people with knowledge, practices and tools so they can add extra value that helps differentiate successful organizations in a competitive, fast-moving global economy. An investment in Microsoft Dynamics and Selective Software is designed to help businesses achieve this goal.

Microsoft Dynamics GP is an integrated, powerful financial and supply chain management solution that is streamlined for ease of installation, rapid user adoption, and affordability that gives companies an effective way to record, manage, and access the information they need to manage the essential functions of their organization.

With the addition of Selective Software's industry specific trucking solutions your trucking company is equipped end-to-end as never before with solutions to enable every employee in every functional area of the company with the specific tools they need to succeed.

Because all modules and every step of your business process are fully integrated, silos of information and redundant data entry is eliminated. There is one version of information.

Data integrity, reliability and access to it is possible as can only be the case with an integrated solution.
