SELECTIVE SOFTWARE

Fuel Distribution

Integrated transportation software solutions that help drive your business…
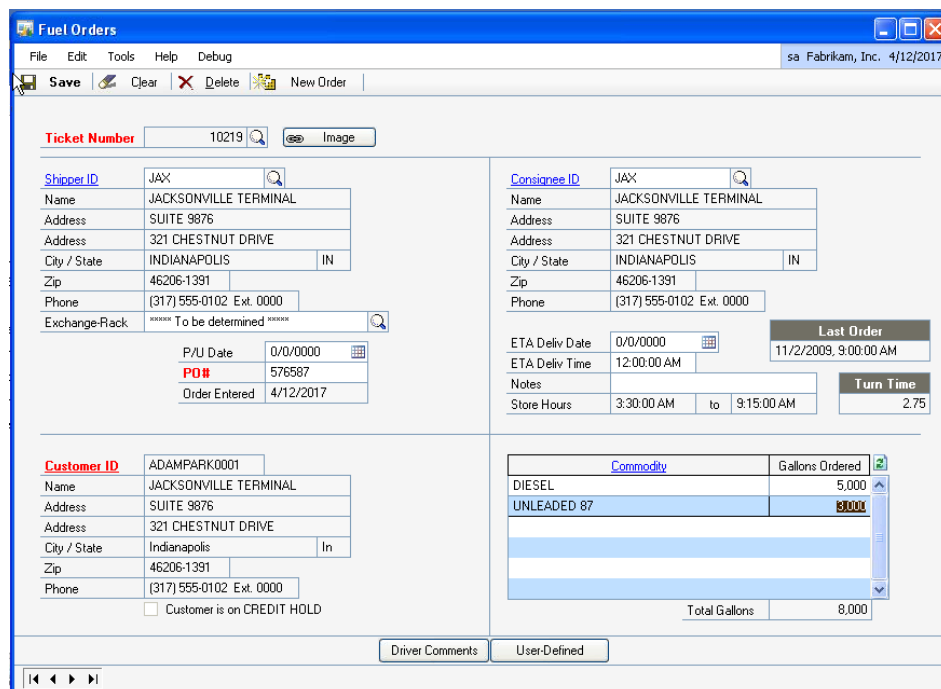

Fuel Distribution integrates order processing, dispatching, delivery, billing and all documentation related to these transactions into an all-in-one end to end business management solution.

Among numerous other features (see feature list at right), fuel orders are processed using an easy, one-time entry of information. This results in an increase in efficiency and productivity of employees thereby maximizing the potential of your business.

The integrated posting of trucking transactions to Microsoft Dynamics GP provides up-to-date knowledge of your financial position for more effective decision making.

"The implementation of this Industry-Specific Fuel Distribution Trucking Application has allowed for increases in revenue and productivity that go far beyond our initial expectations, and continue to increase every day."

Mark Race

Make your company people ready

A people-ready business is one where people can apply their unique skills, insights and experience to create new products and services, work responsively with customers and partners, and drive operational excellence in every aspect of the business. People-Ready businesses support people with knowledge, practices and tools so they can add extra value that helps differentiate successful organizations in a competitive, fast-moving global economy. An investment in Microsoft Dynamics and Selective Software is designed to help businesses achieve this goal.

Microsoft Dynamics GP is an integrated, powerful financial and supply chain management solution that is streamlined for ease of installation, rapid user adoption, and affordability that gives companies an effective way to record, manage, and access the information they need to manage the essential functions of their organization.

With the addition of Selective Software's industry specific trucking solutions your trucking company is equipped end-to end as never before with solutions to enable <u>every</u> employee in <u>every</u> functional area of the company with the specific tools they need to succeed.

Because all modules and every step of your business process are fully integrated, silos of information and redundant data entry is eliminated. There is one version of information.

Data integrity, reliability and access to it is possible as can only be the case with an integrated solution.
