

Imaging for Trucking

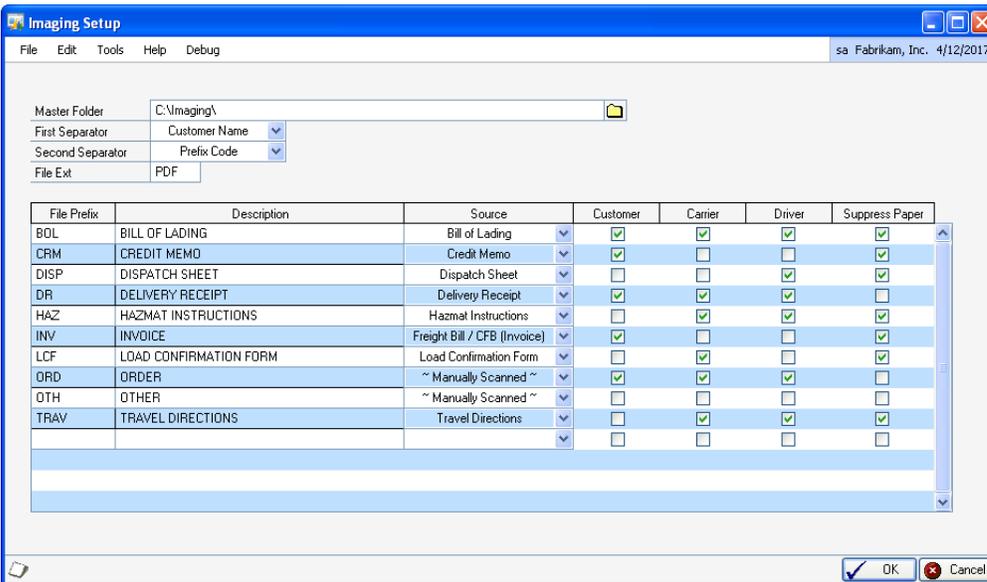

Integrated transportation software solutions that help drive your business...

Document Imaging for Trucking provides a unique transportation document management solution that produces industry-standard high-resolution PDF copies of important Trucking documents. This addition saves valuable employee time by electronically storing and retrieving important Trucking documents, allowing them to be retrieved and e-mailed as attachments.

Designed for Trucking companies that need an integrated Document Imaging and Management Solution, this extraordinary add-on for Trucking Applications provides specific functionality to prepare and store PDF copies of important documents. While printing Freight Bills, Delivery Receipts, Bills of Lading, etc. an imaged copy of the document can be automatically generated using background processing transparent to the user. These documents can then be retrieved and printed or e-mailed to customers as attachments. This results in an increase in efficiency and productivity of employees thereby maximizing the potential of your business.

Features List

- Integrated Design
- Seamlessly Process Freight Bills, Bill of Ladings, Delivery Receipts, Driver Directions and more...
- E-mail using Customer-Specific Contact Lists by Imaged Document Type
- Electronic Record Keeping allows for instant 'One-Click Document Retrieval', Re-Printing and e-Mailing
- Saves Postage Costs
- Looks Professional
- Easier to locate all important Trucking documents using a user-definable tree file structure
- Integration to Trucking Applications
- Support manually scanned documents using any TWAIN compliant scanner

Prerequisites

- Requires the 'Base Trucking System' as a prerequisite
- Requires Adobe Standard version to be able to create PDFs within Dynamics GP

Make your company people ready

Integrated transportation software solutions that help drive your business...

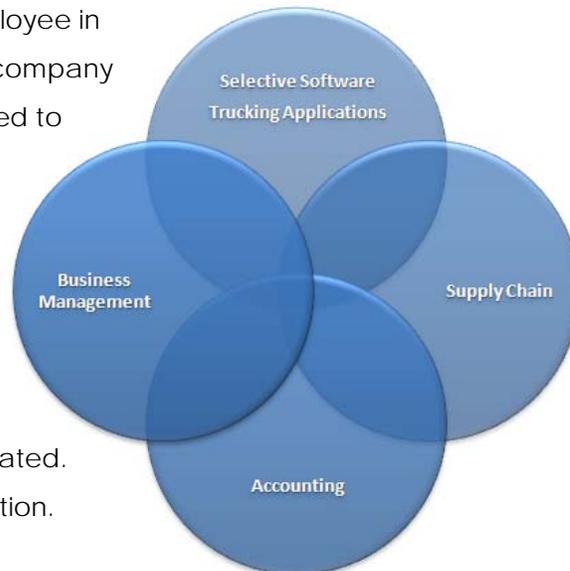

A People-Ready business is one where people can apply their unique skills, insights and experience to create new products and services, work responsively with customers and partners, and drive operational excellence in every aspect of the business. People-Ready businesses support people with knowledge, practices and tools so they can add extra value that helps differentiate successful organizations in a competitive, fast-moving global economy. An investment in Microsoft Dynamics and Selective Software is designed to help businesses achieve this goal.

Microsoft Dynamics GP is an integrated, powerful financial and supply chain management solution that is streamlined for ease of installation, rapid user adoption, and affordability that gives companies an effective way to record, manage, and access the information they need to manage the essential functions of their organization.

With the addition of Selective Software's industry specific trucking solutions your trucking company is equipped end-to-end as never before with solutions to enable every employee in every functional area of the company with the specific tools they need to succeed.

Because all modules and every step of your business process are fully integrated, silos of information and redundant data entry is eliminated. There is one version of information.

Data integrity, reliability and access to it is possible as can only be the case with an integrated solution.
