Fastpath Audit Trail

Continuous monitoring solution offering superior performance and key reports that auditors demand

With superior performance and configurability, Fastpath Audit Trail is an easy-to-install and configure solution that will allow you to analyze changes to your Microsoft Dynamics transaction and master data. Quickly and easily, you can understand what data has been changed, who changed it and the before and after values.

Fastpath Audit Trail features include:

- Track changes made from within Microsoft Dynamics and external sources
- Capture before/after values, including items that have been deleted
- Monitor Microsoft SQL Server schema changes
- Extensive list of audit trail templates
- Quick implementation that offers rapid return on investment
- Best-in-class performance and reporting for Microsoft Dynamics

Fastpath Audit Trail provides templates and reports for:

- Microsoft Dynamics AX
- Microsoft Dynamics GP
- Microsoft Dynamics CRM
- Microsoft Dynamics SL
- Microsoft Dynamics NAV
- Various ISV solutions and third-party applications

Fastpath Audit Trail is a .NET application designed to be used with any SQL-based application.

System Compatibility:

ERP
- Microsoft Dynamics AX – versions 3, 4, 2009
- Microsoft Dynamics NAV – versions 5, 2009
- Microsoft Dynamics GP - versions 6, 7, 8, 9, 10, 2010
- Microsoft Dynamics SL – versions 6 and 7

Database
- Microsoft SQL 2000, 2005, 2008
- Microsoft Office
- Office 2000, XP, 2003, 2007, 2010

Operating System
- Windows XP, Vista, Windows 7, Server 2000, 2005, 2008

Product Benefits:

Immediate ROI
Audit Trail is easy to install, configure and use. Within just hours of set-up, you will be able to easily track changes to your system including: who, what, when, and to/from.

Actionable Information
Obtain useful data from your system that previously was unavailable. Get all the information you need to make informed decisions.

Seamless Performance
Works seamlessly with Microsoft Dynamics with minimal system impact.

Unlimited Flexibility
No matter the need, you can quickly configure custom or standard reports for quick analysis.

"Fastpath's products are designed for companies like ours and are easy to implement. With the standard templates for audit trail and conflict lists for SOD included with the product, we are able to generate meaningful reports in a matter of hours now vs. days or sometimes weeks before."
