Fastpath Audit View

Continuous monitoring solution for database change and exception reporting

Audit reporting is only useful if someone reviews it. Fastpath Audit View allows the business user to easily schedule and deliver audit reports on an as needed basis without needing assistance from the IT department. Whether you want to see postings to a certain GL account on a daily basis or if you want to see purchase orders created over the last month, Audit View offers the flexibility and reporting you need.

The Audit View Reports Wizard allows the business user to select criteria for a given report and save that criteria for use whenever they need it. With just a few clicks, you can schedule reports to be delivered to the right person in the format they require.

Fastpath Audit View puts the audit data your company needs in the hands of the right user on a timely basis leading to better business processes.

Features:

- Audit report design and scheduling tool for business users
- Save key audit reports for easy re-creation
- Define custom report schedules (daily, weekly, monthly)
- Scheduled reports emailed to any user via Excel or PDF attachment

System Compatibility:

ERP

- Microsoft Dynamics AX – versions 3, 4, 2009
- Microsoft Dynamics NAV – versions 5, 2009
- Microsoft Dynamics GP - versions 6, 7, 8, 9, 10, 2010
- Microsoft Dynamics SL – versions 6 and 7

Database

- Microsoft SQL 2000, 2005, 2008
- Microsoft Office
- Office 2000, XP, 2003, 2007, 2010

Operating System

- Windows XP, Vista, Windows 7, Server 2000, 2005, 2008

Product Benefits:

Easy Access and Analysis

Fastpath Audit View allows a user fast access to Microsoft Dynamics ERP data. Whether you are a CFO or an auditor, the easy-to-use interface makes finding and analyzing data simple.

Designed for the Business User

The tool is designed for business users, not just IT professionals. With just a few clicks, you can identify the business data you are interested in and how often you want to see it.

Find Problems Fast

With Fastpath Audit View's exception reporting, a manager can easily keep track of any questionable transactions. At quick glance, you can identify the type of transaction and when it occurred, helping to resolve any issues now versus waiting until the end of the period.

Flexible and Easy to Use

Fastpath Audit View is a stand alone Microsoft .NET application that is flexible and easy to use. The application is easy to install, configure, maintain and does not require additional Microsoft Dynamics users.

"Fastpath's products are designed for companies like ours and are easy to implement. With the standard templates for audit trail and conflict lists for SOD included with the product, we are able to generate meaningful reports in a matter of hours now vs. days or sometimes weeks before,"
